

INNOVATIVE TOOLS FOR YOUR INDUSTRY

Auto Body Adjustment & Service Kit

Reduced damage to surfaces and coatings

Includes a laser cut gap gauge, straight & angle pry bars & trim & clip removal tools.

All Tools Made From Engineering Plastic

These large levers give minimal damage when prying doors, quarter panels or boot lids. The gap gauge makes it easy to confirm a consistent gap.

This comprehensive Body Panel Adjustment Kit comprises our two large pry levers, 5 of our most versatile pry & clip removal tools and our unique laser-cut panel gap gauge to help completion of panel installations & repairs factory-fresh standards of fit and finish. Super slim pry tools are supplied in our strongest material, allowing concentrated prying action where space is limited between panels. Essential for bodyshop & restoration workshops, but in particular offers an unmatched range of solutions for repairs and assembly in alloy and composite materials.

Part # LTFMPAK
