G-HANDLE SUCTION CUPS

GHS100

75mm Cup

100mm Cup

Due to the great response to the G-Handle suction cup, we have introduced a slightly larger size panel puller with a 100mm pad for removing larger dents. The G-Handle design suction cup has a very flexible rubber pad that can be applied quickly to any smooth surface. Great for pulling small dents or applying pressure to the panel while a technician performs repairs. Available in 75mm or 100mm rubber pad.
