

Equalizer Express Glass Removal Tool & Accessories

DTA1007 EXPRESS CORDLESS REMOVAL TOOL

The EQUALIZER® EXPRESS® XRP is designed to cut through the toughest urethane. A heavy-duty 18-Volt motor provides the power to quickly remove the most difficult glass. There is no need to worry about finding an electrical outlet or extension cords. Each kit comes with an 18-Volt battery, a battery charger, one BFE1400 blade, instructional DVD, safety glasses, and a carrying case. Made in the USA.

DW9096XR 18 VOLT BATTERY

There are a lot of 18 volt batteries on the market. This is the only battery that will run your tool correctly.

DW9109 12 VOLT AUTO TO 18 VOLT CHARGER

If you are a mobile glass technician then this is the charger you want. The DW-9109, 12 volt automotive charger plugs into the cigarette lighter and recharges your battery while you are driving to the next job.

BFE1400 & BFE1401 EQUALIZER EXPRESS BLADES

The Equalizer® Express® Blades were developed from daily use on hundreds of different vehicles. The BFE1400 is the most used size and is perfect for slicing through wide bands of urethane. It works well in all places where you plunge cut or angle cut. The BFE1401 and LBE1403 blades are perfect for removing glass that is not broken. Their narrow 38mm (1-1/2" wide) blade is more flexible, which puts less stress on the glass.
