

POWERED AUTO GLASS REMOVAL TOOLS

Equalizer Express Glass Removal Tool & Accessories

LBE1402 & LBE1403 EQUALIZER EXPRESS LONG BLADES

On some vehicles, the urethane is far below the dash, but there is a limited amount of vertical space inside the vehicle. In situations like this, you will need one of the 300mm (12") blades (LBE1402 or LBE1403). They perform the same function as the BFE1400 and BFE1401, but are 50mm (2") longer.

LBE1402

LBE1403

RLE1404 EQUALIZER EXPRESS LONG REACH BLADES

If the urethane is very deep below the dash, you should keep one of the 355mm (14") blades (RLE1404) in your tool box.

RLE1404

ES1406 EQUALIZER EXPRESS SHEATH

The sheath is the unique, patented idea that allows the Equalizer® Express® to use a flexible blade and still have the strength to cut the toughest urethane. The sheath is a protective sleeve that surrounds the blade so the blade will not damage the dash, garnish mouldings or headliners. There is only one size sheath and it fits all Equalizer® Express® tools. Made in USA.

Equalizer Excalibur Glass Removal Tool & Accessories

AEB405 EXCALIBUR DELUXE KIT

The Excalibur® is a compact, lightweight, air-powered version of the Equalizer®. It is designed to cut the urethane bonding that holds most glass in vehicles. The 0.5 mm (.020") thick blade reciprocates inside a metal sheath which protects the dash, garnish mouldings and headliners. The blade is never really exposed because as it leaves the sheath it penetrates the urethane. The sheath also allows you to adjust the blade length to accommodate different urethane widths. Excalibur® has ball bearing construction and runs at 0 to 3,200 strokes per minute. Includes instructional DVD. Excalibur® Deluxe Kit comes with one each 100, 200 and 300mm (4", 8", and 12") sheaths, two of each blades with one pair of safety glasses in a foam-lined, carrying case. Made in the USA.

EES804, EES808 & EES812 EQUALIZER SHEATHS

The sheath is the unique, patented idea that makes the Equalizer® line of tools work. The sheath is a protective sleeve that surrounds the blade so the blade will not damage the dash or garnish mouldings. Sheaths are available in 100, 200 & 300mm (4", 8" & 12") sizes. To extend the life of both the blades and the sheaths, use our SCS-775 Equalizer® sheath cleaner. Made in USA.

EEB793, EEB795 & EEB797 EQUALIZER BLADES

These patented blades have rounded edges so they will not bind in the sheath. Equalizer® blades have the correct Rockwell hardness so they will not buckle inside the sheath. Available in 100, 200 & 300mm (4", 8" & 12") sizes. Made in USA.
