

Locking Strip & Rubber Gasket Tools

AP6020 SELF LOCKING RUBBER TOOL

Designed to use on self locking rubber gaskets to seal the locking channel. The ball point tip helps to prevent the tip slipping out of the rubber.

AP6021 SELF LOCKING RUBBER INSERT TOOL

This self locking rubber insert tool is commonly used on construction vehicles and truck windows to insert the locking rubber flap into the retaining side of the locking rubber.

AP6030 MULTI-LOCKING STRIP TOOL

Supplied with 4 different size heads that fit most locking strip applications. Use at 90° or in line with the handle to insert the locking strip. On trucks you often need to remove the sun visor to insert the locking strip. By swiveling the locking strip head on a 90° angle to the handle this may allow the technician to insert the locking strip without removing the sun visor and avoiding down time.

BDA251 FOOTLOOSE RUBBER GASKET RELEASE TOOL

Here is a great solution to a frustrating problem. Many vehicles have large, rubber-set windscreens. The common method to remove these windscreens is to put your feet against the glass and push while releasing the rubber gasket with a hook tool. The problem with this is the distance can be so great that you cannot push out and use a hook tool to release the gasket at the same time. With Footloose™, you can push out on the glass with one hand while you release the rubber gasket with the other hand.

AP6060 RUBBER GASKET CLEANER

When you get a tempered/zone toughened glass broken in a rubber gasket window, the broken glass needs to be removed before fitting the new window. This tool removes the shattered glass stuck in the rubber gasket. Using a pulling motion, the tip will extract the broken glass out of the gasket ready to re-install the new glass.

RT752 EQUALIZER ROPE INSERT TOOL

This handy tool is designed to ease the rope under the lip and seat it in the groove of the gasket. Comes with a sturdy rope that will reach around the largest rubber gasket. Made in USA.

AP6085 ROPE INSERT TOOL

The rope tool is designed to assist with inserting the rope into the windscreen rubber groove ready for easy re-installation of the glass.
