

Wiper Arm Removal Tools

WAP800 ELITE WIPER ARM PULLER SET - 8Pc

Many of today's wiper arms are made out of cast metal therefore, forcing the removal can cause breakage or damage to expensive wiper arms. This specialised elite wiper arm kit is designed to remove various OEM wiper arms on BMW, Ford, Jaguar, Peugeot, Mercedes, Mazda and many more.

A detailed list is supplied with each kit.

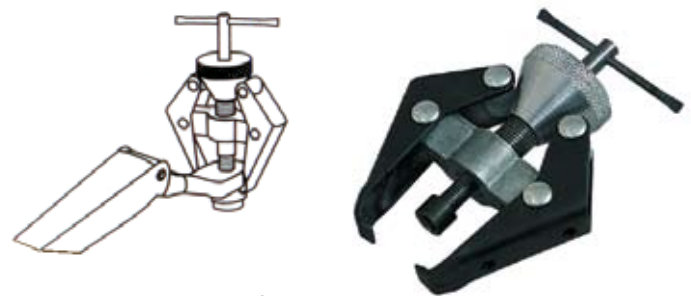

Supplied in Carry Case

AP3048 WIPER ARM PULLER

The Wiper Arm puller provides a safe and effective tool to remove those stubborn and difficult wiper arms. Remove wiper nut and place tool over wiper arm, tighten knurled cone screw until jaws touch the wiper post. By turning the T-Handle clockwise, this will release the wiper from the shaft.

NO FORCE REQUIRED Avoids breakage of the wiper arm and damage to the wiper shaft.

AP3050 WINDSCREEN WIPER ARM TOOL

Simply place the "hook" under the arm base, lift and squeeze the wiper arm and tool handle together to remove.

WP2316 WIPER ARM PULLER

This sturdy puller has adjustable arms to cater for different sized wiper arms. Position the hooked legs under the wiper arm base and apply pressure to the knob by tightening gradually to remove the wiper arm. The direct pulling motion is less likely to break a seized arm than other leverage tools.

NEW

WR7716 WIPER ARM REMOVER

Wiper arms can sometimes seize to the shaft requiring a sturdy puller to release them. Simply undo the retaining nut or screw, place the puller over the wiper arm ensuring the prongs are positioned on the arm and then screw down on the handle to apply pressure.
