

Remove all urethane fitted glass, mouldings and panels without breakage, including all laminated and encapsulated glasses

Easily reach urethane below dashboards or hard to reach areas

Long Blades

Flexible blades follow contour of hatch & curved glass

Thin Flexible blades

Cut from inside, with cutting depth control to protect painted surfaces

Short Blades

Precise cutting for tight spaces and small encapsulated glasses

Small Tool for Difficult Glasses

Cut from outside vehicle for a fast cut-out without physical force

Powered Cold Knife Blades

Cut underneath moulding to save expensive encapsulated glasses

Reverse Grind Blades

Difficult bus and train glasses, wide and hard urethane

Car, Bus & Train glass removal

Remove bonded panels including Aluminium, Fibreglass & PVC

Car, Bus & Train panel removal

Allows Precise Cutting From Inside or Outside Vehicle
